EDUCATION

Web Development

Zero To mastery

July 2022 - October 2022

Completed Web Developer Bootcamp, I learned best practices to write clean, performant bug-free code, learned React to build rich front-end applications, Mastered modern Web Development fundamentals as well as advanced topics, used NodeJS to write server-side JavaScript, learned to implement user authentication, built real-world projects using all the skills learned in the course.

WORK EXPERIENCE

Software Engineer - Volunteer at Epistimis - Remote March 2023 - Present

- Utilized frontend technologies including Next.js, Typescript, and Leaflet Map to deliver an intuitive and seamless user experience, resulting in a 25% decrease in bounce rate.
- Designed and implemented backend functionality using Node.js, Express.js, and MongoDB to provide real-time updates on data breaches and cyber threats, resulting in a 50% increase in user retention.
- Assisted research team in gathering currency data from reliable sources, ensuring accurate and up-to-date information for users selecting their preferred currency.

Frontend Engineer at Bella's - Boston, MA January 2021 - June 2021

- Generated a 10% monthly customer increase through advertising and brand awareness strategy.
- Led a comprehensive website redesign project, encompassing design, strategy, and launch for the company.
- Provided CMS and SEO training to the owner, enabling them to effectively manage their website.

Mail Room Supervisor - Boston Children's Hospital April 2023 - Present

- Supervised a large mailroom, processing an average of 5000 pieces of mail and packages daily, ensuring timely and accurate delivery.
- Implemented digital tracking and automated sorting, increasing operational efficiency by 35% and reducing mail misdirection.
- Led and trained a team of 10, improving productivity and reducing turnover, while conducting safety audits and adhering to postal regulations to maintain a safe workspace.

PROJECTS

Good Life Fit App - https://github.com/rubastricks/workout_site

- Technologies used: MERN (MongoDB, Express.js, React, Node.js), Material UI, Rapid API, Emotion, and more.
- Implemented the MERN stack (MongoDB, Express.js, React, Node.js) for the backend, ensuring robust and scalable functionality.
- Styled the app using Material UI, Emotion, and CSS, resulting in a visually appealing and user-friendly interface.
- Integrated Rapid API to provide extensive workout ideas, enabling users to search for exercises and discover relevant equipment through GIFs and YouTube videos.

Chess Game - github.com/rubastricks/chess-game

- Technologies used: React.js, Tailwind, Chessboard.js & Chess.js
- Fully styled with Tailwind & CSS
- The game allows players to play against the computer or Multiplayer in the local machine.

Portfolio - github.com/rubastricks/portfolio-2

- Technologies used: Parcel, Bootstrap 4, SASS, ScrollReveal.js & Tilt.js
- Fully responsive & Styled with Bootstrap v4.3 & Custom SCSS.
- Personal portfolio to showcase my projects and skills, with the aim of motivating myself to learn new CSS frameworks and JavaScript packages.
